

Christmas
Decor®

The Decor Group

Since 1996, Christmas Decor has been perfecting the craft of making homes (as well as commercial properties, municipalities, and attractions) warmer and brighter than anybody else for the holidays. Let the experts at Christmas Decor handle the design, installation, maintenance, and storage of our leased products. We're nationwide so no project is too small, too far, or too big.

Nite Time Decor develops and manufactures top-tier quality, life-time warranty lighting products offered at factory level pricing. They are the world's premiere provider of outdoor lighting systems! With over 20 years experience, Nite Time Decor can help you turn your property into a showplace.

Founded in 1954, Barcana is a world leader in Christmas Trees, fiberglass figurines, translucent illuminations, and ornaments for the Christmas retail and wholesale industries. Our goal is to provide clients with unique and elegant options that add Christmas 'magic'. Barcana's exceptional quality and unparalleled product warranties offer a competitive edge to retailers and contractors.

Founded in 1987, Fotodiasiasi (FDS) has become the world leader in illuminated decorations. We've cultivated an exclusive relationship with FDS to put an exclamation point on our diverse product line giving our customers a clear advantage when bidding for commercial/municipality opportunities. The FDS impact on any project is noticeable in traffic and social media exposure .

Now control your landscape lights with our New RGBW MR 16 lamp. Using an iPhone, iPad or laptop, control your lights creating different effects, scenes, schedules; dim them whenever and however you may want from anywhere on the property.

Decor Smart is our proprietary lighting solution that enables advance color control from a client's phone app. Using an iPhone, iPad or laptop, you can control your lights creating different effects, scenes, schedules; however you want from anywhere on the property. It also works with all our other smart RGB lights including PermaLites.

Lighting

Our team has extensive front-line experience in personally working with these products! With the largest buying power in North America, we can ensure the highest quality product available at the most competitive value in the market. We are proudly NOT the cheapest.

LED products vary greatly in quality, color consistency and longevity. Don't jeopardize your project's success or client relationships over using a lesser product. It doesn't take long for product failures and color issues to far outweigh any cost differences.

We have several proprietary elements incorporated into our product line that are not available anywhere else. The bottom line, our products are quicker and easier to install, yield the greatest aesthetics and stand up against the elements.

Our commercial LED mini lights were designed for the demanding needs of professional installers:

- **TDG Commercial Rectifier - Exclusive**
- **Three Year Warranty - Exclusive**
- Fused plugs, Full wave rectified
- Wide angle 5mm concave lens
- Balled for easy installation
- Orange, Yellow, Red, & Multi Light Strands are 2.4 watts each; all others are 4.2 watts each.
- Sold in case packs of 24

We developed our LED C7 and C9 bulbs for the rigors of commercial installations:

- **Acrylic shell - Exclusive**
- **Three Year Warranty - Exclusive**
- High impact acrylic with added UV protection retrofit C7/C9 bulbs (C7/C9 Twinkle Lights are Polycarbonate)
- Water tight sealed - Domed covered diodes for added weather resistance
- LED C7 Legacy bulbs have 3 LED diodes/.6 watts each
- LED C9 Legacy bulbs have 5 LED diodes/.96 watts each
- SMD C7 bulbs have 2 larger, brighter diodes/.58 watts each
- SMD C9 bulbs have 3 larger, brighter diodes/.58 watts each
- Smooth Ceramic and Faceted bulbs
- Sold in case packs of 500, 100, and 25 (varies by type)

All of our LED lights are UL/CSA Approved

There is a tremendous amount of misinformation permeating through the lighting industry - specifically with regard to Light-Emitting Diode (LED) technology. There is no doubt that LED lighting is a far better option than its predecessors—incandescent bulbs and fluorescent compacts and tubes. Like all new products, consumers must be able to separate fact from “creative marketing.” Through many hours of research and working closely with our manufacturers, we have assembled some helpful information that will help our clients discern between reality and fiction.

Fact vs Fiction

Compared to older lighting technology, LED offers:

- Longer life
- Lower energy consumption
- No mercury content
- An environmentally-friendly alternative

Contrary to popular belief, LEDs do not last forever. Some sources promote LEDs with 100,000+ hour lifespan - more than 11 years of continuous burning. The fact is, LED technology hasn't been around long enough for testing to adequately support this claim.

Based on current knowledge, conservative industry experts estimate that LEDs have a useful life ranging from 30,000 to 50,000 hours. While this is a remarkable improvement over older technologies, there are a number of factors that can negatively impact the life of LEDs, including associated bulb components and usage patterns. LEDs tend to dim as they progress through their life cycle, but nevertheless, they do last much longer than other lighting technologies.

ElitePro vs Other LEDs

LED Mini Light Sets

Our LED Mini Light sets are fully rectified; the natural "flickering" of the electrical wave conversion is not visible to the human eye. Most of the industry will use non-rectified or partially-rectified sets in order to save money. The result is a strobe or "flickering" effect.

In addition, sets are also sealed for weather proofing. Due to patent issues, most of the industry will use a replacement bulb—which 1) isn't needed due to the long life of the diodes, and 2) creates a channel for moisture to get in and damage the internal construction of the light set. The result is either poor or non-performing light sets. Many manufacturers—in an effort to cut costs—do not color match the diodes. As a result, they will produce strings that may have multiple shades of the same color within the same string. We invest the extra money to ensure our diodes match.

LED C7/C9 Replacement Bulbs

Our Legacy C7 bulbs feature 3 diodes. Legacy C9 bulb have 5 diodes in a star pattern in the bulb's base and dome-sealed. Our SMD C7 bulbs have 2 larger, brighter diodes and the SMD C9 bulbs have 3 larger, brighter diodes and both are dome-sealed as well. Most of the industry will feature unsealed 3-diode bulbs, or they will stack up to 5 diodes, which leads to poor light distribution within the bulb, while allowing moisture to penetrate the inner workings of the bulb. In addition, bulbs are self-ballasted or ballast-adapted—compared to the industry standard of being non-ballasted. Similar to our rectified mini light sets, this step will stabilize the "flicker" effect generated by non-ballasted bulbs.

Perhaps the biggest advantage of our C bulbs is our proprietary, high-impact acrylic shell, featuring added UV protection. These shells will hold their color and clarity, compared to others in the industry that feature polycarbonate or polystyrene, which tend to cloud and discolor over time.

**Proprietary
Acrylic Shell
NEVER
Discolors**

Polystyrene
(3 seasons in the field)

Polycarbonate
(3 seasons in the field)

Elite Pro High-Impact Acrylic
(4 seasons in the field)

C Bulbs

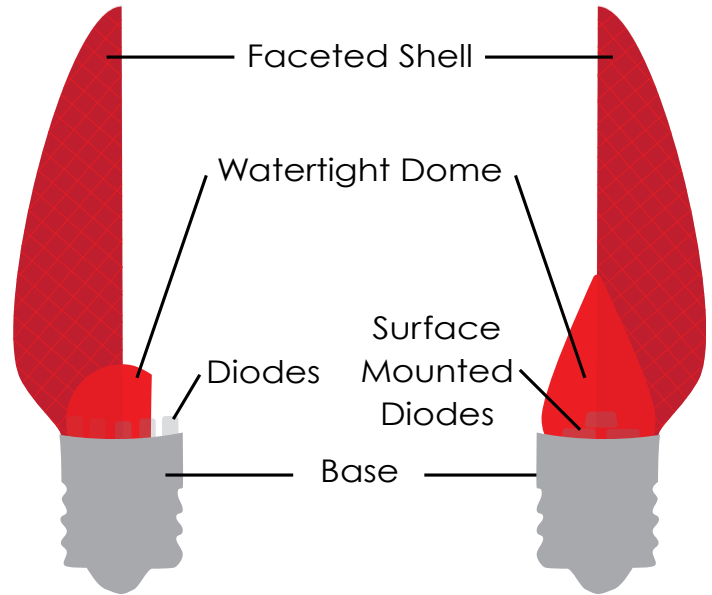

Our C7/C9 LED Replaceable (Retro) Bulbs feature:

- High Impact Acrylic Shell
- Added UV protection to guard against discoloration
- C7 Legacy have 3 Diodes/C9 Legacy have 5 Diodes while our C7 SMD (Surface Mounted Diode) Bulbs have 2 larger, brighter diodes and our C9 SMD Bulbs have 3 larger, brighter Diodes in a cone-shaped dome. Both Legacy and SMD Bulbs are covered with a watertight dome to help prevent the elements getting to the diodes
- Weather resistant

Twinkly Pro RGB Cone Tree

This commercial cone tree comes with green spruce garland and smart addressable RGB LED bulbs, perfect for making a statement in your holiday decor. With just an application on an iOS device.

The Twinkly app can map the LEDs of your decoration in 30 seconds. From your Smartphone. Apply effects to LEDs managed by different controllers. Group controllers through the app let you manage directly up to 10,000 LEDs on different controllers. Twinkly app comes with multiple preset effects and customization options. Already using other software to create effects? Enjoy the powerful Twinkly Pro tool to import effects created with: Madrix, xlights, Video sampling.

Twinkly PRO merges smart addressable LEDs with a connected App creating a professional light system that saves time and costs.

Twinkly PRO Addressable LEDs & Colors

RGB LED - Twinkly PRO RGB LEDs have a matte lens that gives the lights bright color and RGB hues to express a 16 million color range.

AWW LED - Twinkly PRO introduces the world's first 2 pin addressable LEDs. Combining 3 natural colors of Amber, Warm White and Cold White, offering pure white colors and a wide range of shades.

Wi-Fi Controller

The Twinkly PRO wi-fi controller connects the lights to the mobile app through the local wi-fi network and enables you to manage up to 400 LEDs in 2 separate lines. Perfect for small/private spaces. Group/Combine up to 10 controllers via the Twinkly App, allowing you to manage and remote control 4,000 LEDs easily.

Ethernet Controller

The Twinkly PRO Ethernet controller was conceived for larger installations in public and wide open spaces. Connect up to 4 light strings. Each controller can manage up to 1,000 LEDs in 4 separate lines (250 LEDs/port). Group/Combine up to 10 controllers via the Twinkly app to manage up to 10,000 LEDs.

Group Controllers, Wirelessly

Manage more controllers at the same time

Twinkly PRO lights can be grouped to be managed and controlled together.

Join or Sync group types within the Twinkly app to scale up the number of LEDs available or to manage synced objects.

Join Group

The Join option is perfect to increase the number of lamps a single controller can manage. This gives you the option of adding multiple controllers by virtually managing them as a single one.

Sync Group

The Sync option is perfect to apply the same effects on two or more controllers. This grouping option is designed for managing multiple products together and keeping them in sync. Grouping is made through the app and virtual connections between controllers. No cable/physical connection is required.

Twinkly PRO Components

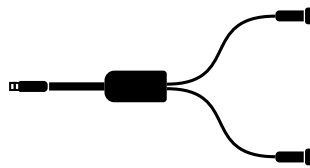

Item #	Description	Light Count
TWPRO-STARTERKIT	Starter Kit	500

Starter Kit Consists of:

- 2-TW-PLC-S-CA-1x125STP-G-A-X

Illuminated Bows

Item #	Size	Weight	Case
BOW-LITXSM-TW	22" X 41", Tail 32"	6 lbs	1
BOW-LITSM-TW	28" X 47", Tail 37"	8 lbs	1
BOW-LITMD-TW	43" X 70", Tail 56"	13 lbs	1
BOW-LITLG-TW	55" X 82", Tail 66"	18 lbs	1

These Patented ILLUMINATED BOWS eliminate the dark spots in your displays. The twinkle 3mm, weather resistant LED minis add an additional elegance you can't get with any other bow.

MENORAHS

These simple, yet elegant, Menorahs are perfect for indoor or outdoor use. Each Menorah comes with:

- 9 Chimney LED bulbs
- Is constructed of aluminum with a silver finish
- Choice of an indoor or outdoor base
- Canvas carrying and storage case
- Automatic lighting PCB Board, just set it and forget it and it will light a new light every 24 hours
- 1.5', 2', 3', 6', 9' and 12' available.

Replacement bulbs available.

DREIDELS

This 3' Driedel is a representation of the spinning toy used during Hanukkah. It is remote controlled with RGB LEDs that can change colors or remain any color chosen. Should be used indoors only.

Fotodiasiasi (FDS)

Illuminated Displays, Walk-Throughs, Photo-Ops, etc.

Why We Chose FDS

Barcana is the exclusive **North American distributor** for illuminated decorations from FDS illumination, formerly Fotodiastasi illuminations, out of Thesolaniki, Greece. With over **30 years** of experience and over **1.7 million sq ft** of factory space, FDS illumination is well known throughout the world for their quality and innovation.

Unlike the competition, over **90% of the products** used to create these beautiful pieces are **manufactured in-house**. FDS illuminations' quality management system ensures the highest quality products of their kind in the world. FDS illumination sets themselves apart from the competition with:

- **Bracket Poly-carbonate and Rubber Protections**
- **Metal Welders**
- **Connection Boxes with IP68-69 rating**
- **Branch Garland Productions**
- **LED Strings and Rope Light with IP65-68 ratings**
- **Aluminum Quality GOGO**
- **ISO 9001 Certified**
- **Patents on Innovative Systems**
- **Awards and Certificates**
- **Powder Coating Factory**
- **Plexiglass Manufacturing**
- **Sheet Metal Machinery**
- **Green Factory: LED Lamps, Green Building, Recycling Processes, etc.**

We believe when you see the quality of FDS illumination products in person, you'll understand why a quality brand like Barcana has agreed to bring their product to North America.

OVER 5,000 ITEMS AVAILABLE.

Who is FDS?

FDS has been manufacturing since 1987. The company now operates from a 500,000 sq ft factory in Greece and over 1,200,000 sq ft factories in North and South Bulgaria.

FDS is one of the largest decorative lighting manufacturing facilities in the world!

Production Facility in Greece

With facilities to build and test in-house, the development process of a project is quick and efficient. You get a product that is more reliable and delivers what is promised.

Production Facilities in Bulgaria

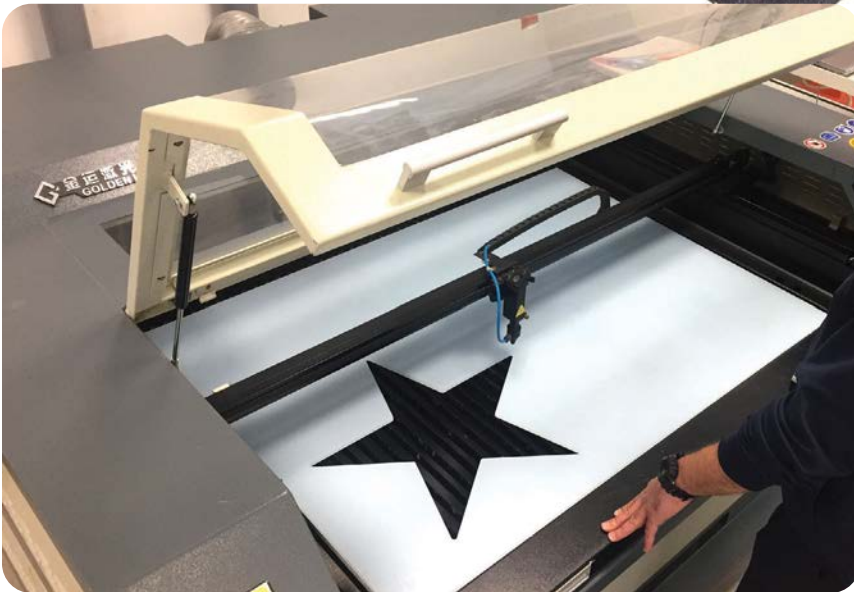

Materials and Technology Put FDS at the Top

FDS has the latest and most advanced industrial machinery, allowing them to replace third-party suppliers while maintaining and ever improving efficiency in the production.

Robotic Powder Coating

Many color choices available

Laser Cutters for Plexiglass and Metal

Their high power, precision machines and software can quickly convert a design into a precision laser cut product.

Vinyl Production

FDS has the flexibility to create any kind of design and use it on their finished products.

Trees and Greenery

Trees, Wreathes, Garlands, Sprays, etc.

TREES

Our top of the line trees.

Our most notable products are our trees. We offer a unique selection of branch styles, lighting options, and sizes. 70ft trees are not a problem! Our most popular trees also come in several profiles and some have an unlit option.

Previously, LEDs have been too harsh for interior applications but we've worked diligently creating an LED that imitates an incandescent warm glow more closely than any other LED on the market. Our Glow Warm White LED light is the result.

Our trees are built to last. We take pride in our products and offer a 25 year warranty on hinges, 6 years on our LEDs, and 4 years on our incandescent lights.

- Solid Steel Structure
- Steel Tree Trunk Pole
- Tensile Strength Tips
- Extremely High Light & Tip Counts
- Easy to Assemble Construction
- Composed of PE/PVC or PVC

One Plug Pole

- Solid Steel Structure
- Pole to Pole Electrical Connection
- No Hassle Placement
- No Extra Cords in the Tree
- Easy to Assemble Construction
- Available on all our 6-12' trees

PVC

PVC is a non-toxic, hypoallergenic, and flame-retardant material. This is a classic look for artificial trees that reminds many of their warm childhood Christmas celebrations. These are also a great solution for exterior usage.

PE

PE is a non-toxic, hypoallergenic, flame-retardant material. PE needles are molded for the illusion of realistic needles. This is the fashion forward look, and the most authentic the industry has to offer. To keep costs affordable, all of our PE trees are mixed with PVC on the interior.

5mm Wide Angle LED Lights

Our LEDs use about 85% less energy than traditional incandescents, don't overheat, and are safe inside & out. Our Commercial LEDs have a crisp, clean, warm white glow in a one-piece sealed construction (better weatherproofing) to help extend their life expectancy. Available in all our greenery.

Commercial

Tower Trees

We have several options for our commercial tower trees including our top of the line Breckenridge, our well known Everest and our new high quality, economical Sterling.

6' Man

14' Tree

20' Tree

50' Tree

Sterling Tower Tree

This realistic looking commercial evergreen was inspired by the beauty of nature. The Sterling offers a competitive price point that still outshines most premium level trees in the market.

Patented Topper

This tree also offers a patented topper that allows branches to be used further up the tree, greatly reducing the size (and weight) of the pole for easier installation.

Item #	Size	Width w/ Branches	Tips	# of Lights
TREESTELED-16	16'	120"	11454	5800

Other sizes may be available.
Also available in Co-Axial minis.

Everest Commercial/Residential

Available in Full and Medium

- Each tree comes on rolling wheels that lock and has its own look and feel.
- Outdoor Rated
- Sturdy bases and trunks add stability to keep each tree firmly planted in an upright position.

Greenery

Our line of wreaths and garland are made from top quality PVC and have been perfected over the years to bring you our fullest most lush greenery yet. These are the perfect canvas for adding bows, deco-mesh or our mixed picks. Available both lit & unlit and in a wide range of sizes. Lit greenery is available in warm white, warm white with twinkle, cool white and cool white with twinkle LED or clear incandescent minis.

LED Lights

Energy efficient LED's are available in all of our greenery options. LEDs use about 85% less energy than traditional incandescent bulbs. They also do not get warm which makes them safe inside or out.

PVC

PVC is a non-toxic, hypoallergenic & flame-retardant material. This is a classic look for exterior artificial trees.

Frames

Our wreaths up to 48" have a double wire frame. The outer frame is wrapped in foliage, while the inner frame is visible, making this a strong support system.

Our larger frames are made from a strong steel and come in sections, making assembly and storage easier. The size of your wreath will determine the number of sections.

Landscape & Smart Lighting

Nitetime decor, Decor Smart, Premalites 365

About Our Products

Nite Time Decor has been designing and installing landscape lighting systems since 1998. Using our extensive experience, we have developed our own exclusive product line that delivers efficiency, performance, and value to our clients. As we've developed each product, we have focused primarily on construction, design, and value—as the product has to be durable, but also applicable and affordable. We are not interested in installing systems that do not perform long term—we want each installation to look as good years from now as it did the day it was installed.

Long-lasting Construction
Stand Up to Harsh Climate
Balanced Value

NTD Fixtures

The long-term value and performance of a landscape lighting system can be limited by using poor-quality fixtures. At Nite Time Decor, we recognize this, and have secured our own exclusive product line, ensuring that each job is done using the highest quality components. We've developed a fixture for every application—with most products being constructed of durable, cast brass.

Beryllium Sockets

NTD Lamps

The Lamp does the lighting, thus it is critical to use the best quality product to achieve the optimum results. Our LED lamps use only CREE LED Chips. We stock PAR36, MR16 MR11, and Bi-pin LED retro lamps with wattage and beam spread options. Furthermore, we stock a complete selection of incandescent lamps in a variety of wattages and beam spreads to meet your application.

BIPIN

PAR36

MR16

MR11

NTD Installation Accessories

A landscape lighting installation is only as good as its weakest point. That's why Nite Time Decor uses only the finest in installation tools and accessories. Each component we use has been selected or developed based on our years of field experience—we know what it takes to assemble a high-performance landscape lighting system.

NTD Transformers

The transformer serves as the 'heartbeat' of the landscape lighting system. Our transformers are designed for performance—constructed of the most durable materials with the most efficient operation. We carry transformers that are suited for today's LED projects as well as larger transformers designed for big installations. Transformers are available in 50 to 600 watt sizes.

NTD Controllers

Automation of your landscape lighting system creates convenience and cost savings for you—your system can be set to turn on and off whenever you want, and you don't have to worry about it. We carry a selection of the most technologically-advanced controllers in the industry, which can be incorporated into your landscape lighting system quickly and efficiently.

Dimmer Switch

PhotoCell Timer

Astro Timer

NTD Limited Time Warranty

Nite Time Decor guarantees the quality of our products and installation with one of the most comprehensive warranties in the industry. It protects the system and components for years and is effective after the original installation is completed. The warranty DOES NOT cover acts of nature, such as lightning strikes and damage due to physical abuse or vandalism. The warranty is void if anyone other than a Nite Time Decor contractor accesses the transformer for any reason other than the timer adjustment. We will make timely replacements and/or repairs as described below at no additional charge.

Lighting Control Automation Warranty

Nite Time Decor timers, controls, and other automation modules carry a 1-year limited warranty.

Lamp Warranty

Nite Time Decor lamps are covered by a 5-year limited warranty from the initial date of system installation. Only when a Nite Time Decor contractor replaces or installs the lamps does the warranty apply. The installation of the incorrect lamps by the property owner or another firm that causes system failure and/or fixture damage are not covered by warranty.

Transformer Warranty

Nite Time Decor outdoor transformers carry a lifetime warranty.

Light Fixture Warranty

Nite Time Decor guarantees light fixtures for a lifetime, from the installation date.

Wire Warranty

Nite Time Decor outdoor low-voltage wire is covered by a 10-year warranty.

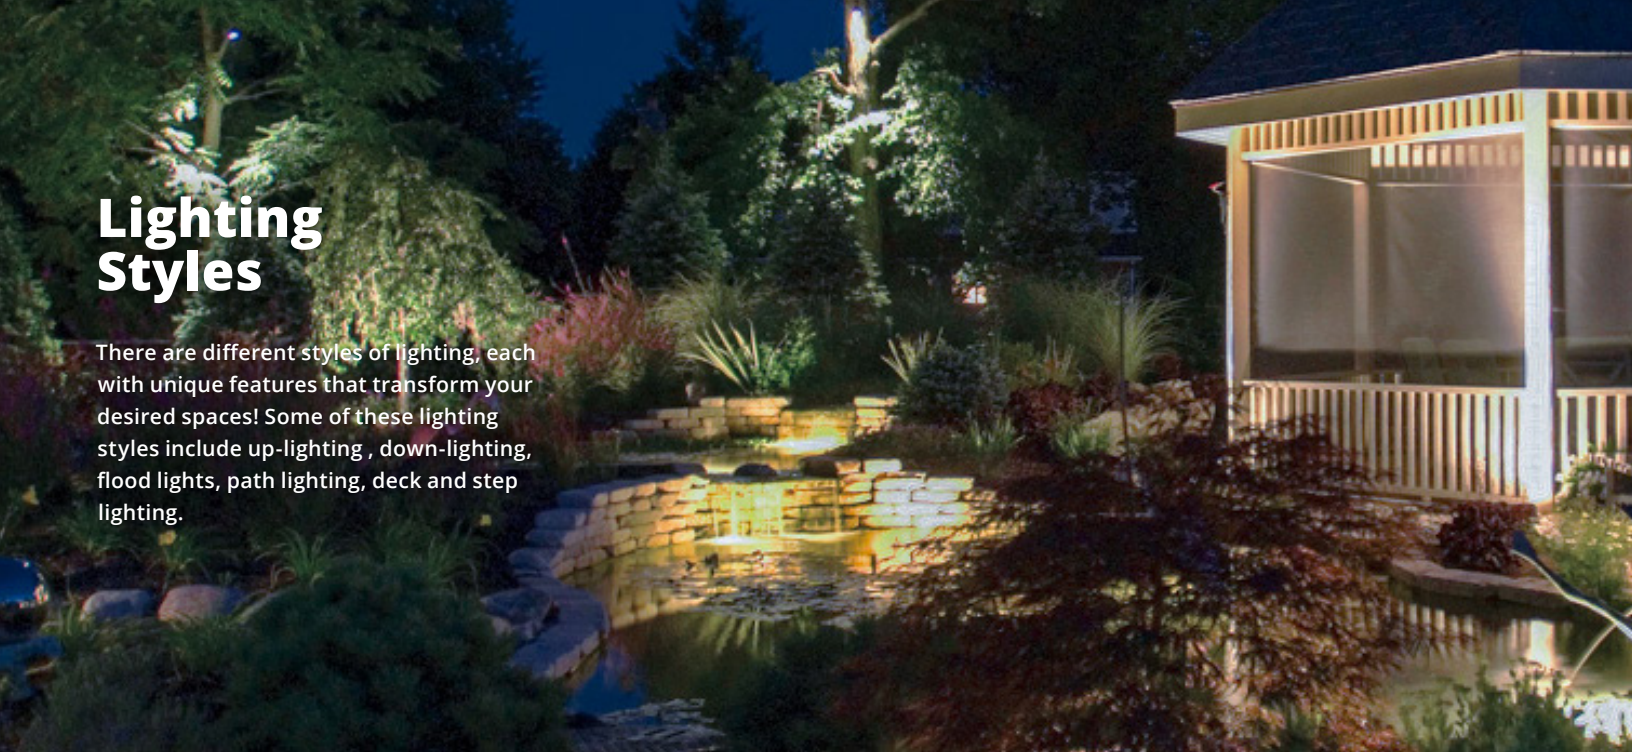

Installation Warranty

Nite Time Decor guarantees installation for one (1) year from installation date. We offer a lifetime warranty on any lighting system that we design, install and maintain. If you choose not to maintain your lighting system with our current maintenance program, your system will be covered only to the limits listed above, or the limits of the individual manufacturer's warranty of the products used in the design.

This warranty covers the performance of the fixtures, transformer and installation. All quality fixtures will experience some finish changes over time. This will not affect their performance, rather increases their appeal. All automation components are covered by their specific manufacturer's warranty.

Lighting Styles

There are different styles of lighting, each with unique features that transform your desired spaces! Some of these lighting styles include up-lighting, down-lighting, flood lights, path lighting, deck and step lighting.

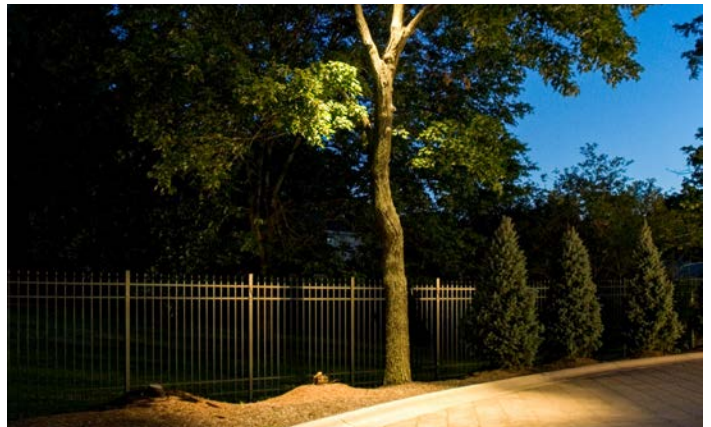

Up-Lighting

This technique consists of lighting a property from the bottom up for an elegant effect

Down-Lighting

Consist of lighting features downwards from the top

Highlighting

This method is used to bring attention to certain elements like trees, walls, etc.

Moon Lighting

Used to simulate moon light by placing lamps above trees, walls, etc

Path Lighting

Used for lighting driveways, sidewalks, walkways to create paths of light

RGB Lighting

Used to bring full color range and create unique moods and styles

Accenting

This technique is used for lighting up stairs, or platforms for night enjoyment

Wall-Washing

Used for highlighting walls with varying flood patterns

Silhouetting

This technique is used for creating silhouettes of greenery like trees, bushes, etc.

Color Temperature (KELVINS)

Kelvins is a measurement used to describe the color temperature of a light source. This is the specification commonly referred to as **CCT Color Correlated Temperature**. It's a gauge of how yellow or blue a white light source appears to the human eye. Landscape lighting scale is typically from 2500K up to 5700K that a description of the warmth or coolness of a light source.

The landscape industry has landed on 2700K as standard Warm White, 300K as standard for Neutral White, and 5000K as Cool White.

WARM WHITE

At the lower end of the scale, from 2000K to 3000K, the light produced is called "warm white" and ranged from orange to yellow white in appearance.

NEUTRAL WHITE

Color temperatures between 3100K and 4500K are referred to as "neutral white" or "bright white" lamps within this range will emit more neutral white light and may even have a slightly blue tint.

COOL WHITE

Above 4500K brings us daylight color temperature of light. Lamps with 4500K and above will give off blue-white light that mimics daylight.

CRI Color Rendering Index

Another part of color temperature is CRI Color Rendering Index. It is a measurement between 0 and 100. At zero (0), all colors look the same. A CRI of 100 shows the true color of an object. Incandescent is the standard all light CRI's are measured against. They are at 100. Typically a CRI of 80 to 90 are regarded as good and those with a CRI of 90+ are excellent. General rule is the higher the CRI, the better the color rendering.

2700K CRI 100

2700K CRI 90

2700K CRI 70

Watts

Watts are a measurement of power consumption. With traditional incandescent lights typically the higher the wattage, the brighter the light. With LED lamps this is different because there is no hard fast rule to correlate wattage with output. One brand LED say 9W may emit enough Lumens to replace a 60W bulb, but another brand may need to use a less efficient LED, say 12W lamp to create enough lumens. In fact, that is why looking at Lumens versus Watts.

Lumens

Lumens is a measurement of total light output also known as the **brightness** of the bulb. More lumens means a brighter light, fewer lumens means a dimmer light.

Lumens are to light what:

Pounds are to bananas,
Gallons are to milk

Lumens let you buy the amount of light you want.

When considering new bulbs, think lumens not watts.

100w Halogen is 1600 lumens, equal to a 10w LED bulb

50w Halogen is 800 lumens, equal to a 7w LED bulb

25w Halogen is 400 lumens, equal to a 5w LED bulb

20w Halogen is 320 lumens, equal to a 4w LED bulb

10w Halogen is 160 lumens, equal to a 2w LED bulb

All numbers are average due to various manufacturers.

Lightbulb Shapes/Sizes

Lamps are described in many ways.
 First by **Base** i.e. E26, E11, GU5.3,
Shape i.e. A, C, G,
Size i.e. 16, 19, 30, 36

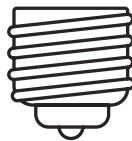

Base

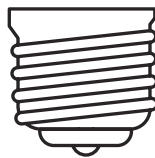

1. Candelabra - E12 North America, E11 Europe
2. Intermediate - E17 North America, E14 (ES, SES) Europe
3. Medium/Standard - E26 (MES) North America, E27 (ES) Europe
4. Mogul - E39 North America, E40 (Goliath ES) Europe
5. Bipin - G4, 5.3 low voltage GU10 line voltage

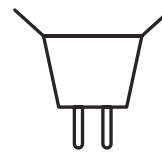

E12

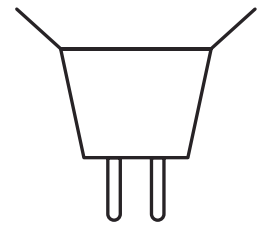

E26

E39

G4

GU5.3

Shape

Typically described first by a letter, then a number to reflect the shape and size of lamp. The letter refers to the shape, and the number refers to size (more on that later).

A. Arbitrary, Angle most resembles a

standard bulb

C. Conical, Candle often referred to Christmas light bulb

G. Globe round or circular

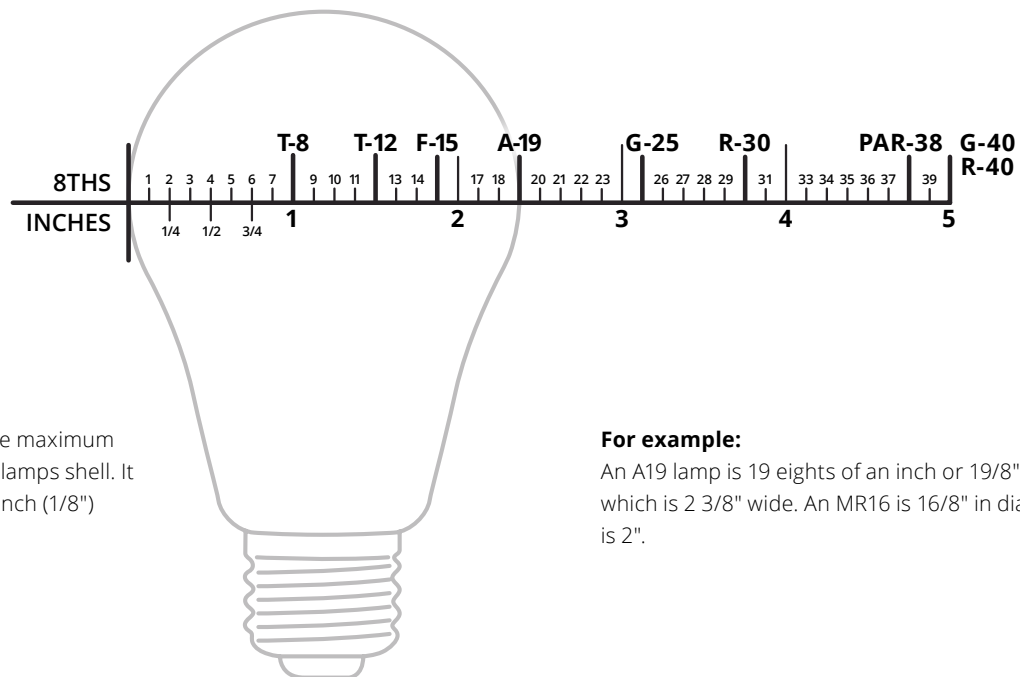

S. Sign called straight sided. Traditionally used in signs.

ST. Straight tapered often seen in vintage-edison style lamps

R/BR. Reflector typically make up flood type lamps

MR. Multifaceted Reflector a directionally focused lamp

PAR. Parabolic Aluminized Reflector like BR lights, but more directional

Sizes

Lamp size is determined by the maximum overall diameter (MOD) of the lamps shell. It is represented in eighths of an inch (1/8")

For example:

An A19 lamp is 19 eighths of an inch or 19/8" in diameter, which is 2 3/8" wide. An MR16 is 16/8" in diameter which is 2".

Ingress Protection

A rating system developed by the IEC (International Electrotechnical Commission) reflects an enclosure's sealing effectiveness from foreign objects and moisture.

Solid Protection

0

Not rated for protection

1

Protection against solid objects larger than 50mm, but not against deliberate contact (contact with open hand palm)

2

Protection against solid objects larger than 12mm (contact from finger)

3

Protection against solid objects larger than 2.5mm (wire or tools)

4

Protection against solid objects larger than 1mm (slender screws or nails, larger insects or potentially invasive small objects)

5

Partial protection against dust and smaller particles

6

Full protection against dust and other similar particles

IP Rating Example

IP65

Water Protection

0

Not rated for protection

1

Protection against vertical falling water droplets (condensation)

2

Protection against vertical falling water droplets when tilted at 15 degrees

3

Protection against moisture spray at up to 60 degree angles

4

Protection against splashing water from any direction for a minimum of 10 minutes

5

Protection against low-pressure jets of water

6

Protection against powerful jets of water at a rate of 100 litres per minute (100kPa of pressure at a distance of 3m for 15 minutes)

7

Protection against full immersion up to 1m in depth for 30 minutes. Always check manufacture specifics for products with this rating

8

Protection against full immersion up to 1m or more in depth for more than 30 minutes. Always check manufacture specifics for products with this rating.

Wire Size

Wire gauge refers to the physical size of the wire, rated with a numerical designation that runs opposite to the diameter of the conductors. The smaller the wire gauge, the larger the designated number.

In the gauges of wire, a gauge number describes the number of dies through which the wire has been pulled in order to reduce it down to a given diameter.

Lumens	330-710
Watts	4, 5, 7
Color	WW, NW, CW
CRI	85+
Voltage	9-15VAC
Hours	50,000
Warranty	5 Years

PAR36 LED Lamp
PAR36LED15W30WW

Beam Angle	24, 60, 120
Lumens	420-1050
Watts	6, 10, 13
Color	WW, NW, CW
CRI	85+
Voltage	12-24VAC
Hours	50,000
Warranty	5 Years

Spotlights vs Floodlights

Spotlights feature a shorter beam spread with longer light reach. Generally, these are used for accenting features in smaller areas like trees, statues, flag poles, etc.

Narrow Spot

Accents specific features like trees and statues. The narrow angle help concentrate light to a specific area.
Typical 15°

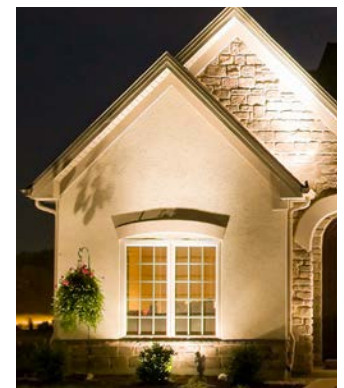

Narrow Flood

Emits a medium wide beam, used by businesses and homeowners for facade lighting.
Typical 30°

Wide Flood

Dispersed beam that covers larger areas. Commonly used for facades, signs, and other landscape applications.
Typical 60°

Super Wide Flood

Used in areas that require the widest amount of light. Often found in commercial/residential facades, garages & parking lots.
Typical 120°

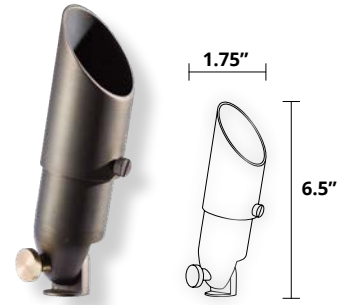

Spot Light Fixtures

Designed to highlight landscape or architectural features like statues, bushes, and more. Using narrow beam patterns, spotlights focus on single objects creating unique lighting visuals.

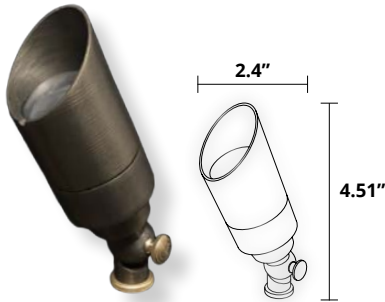

Weathered Brass Spot Light (SPOT-WB)

MR16¹ Weathered Brass Spotlight, PVC Ground Stake with Brass Lock Ring

Mini Spot Light (MSPOT-WB)

Cast Brass MR11² Mini-Spot Light Sphere with Orbital Base, PVC Ground Stake with Brass Lock Ring

A two-story octagonal gazebo is illuminated with multi-colored string lights at night. The lights are strung across the gazebo's interior and around its perimeter, casting a vibrant glow in shades of red, blue, green, and yellow. The gazebo has a dark wooden frame and a white railing. The background shows a dark sky and the silhouettes of trees.

Decor Smart – Bluetooth RGB Landscape Lighting

Bluetooth controlled landscape lighting brought to you by Decor Smart. Easy and powerful control of all your landscape lighting products that allow you to control your lights individually or in customized groups. Schedule colors and effects by day or with our patented calendar scheduler. Schedule specific lighting for parties, birthdays, or your favorite sports teams. Transform your home's curb appeal for every season and be the envy of your neighbors and friends. The possibilities are endless.

Our Decor Smart technology is constantly improving. We are continuously looking for ways to use Decor Smart to help you create the outdoor lighting experience you've always dreamed of. Download our Decor Smart App to control, schedule, and change the colors all of your Decor Smart Lights with the push of a button.

CONTROL WITH DECOR SMART APP

The Decor Smart app gives you full control of your Decorsmart bulbs as well as your Permalites® 365 system. The app provides you with the ability to control your lights in many ways. Never worry about turning your system on or off when you use the app to set a timer for your lights. Set them to automatically turn on at sunset and turn off at sunrise.

Life Forms, Ornaments, Photo-Ops, etc.

Displays

Our display pieces help to create memorable holiday experiences. Whether you're adding a nativity to a traditional design or a solid gold toy soldier to an elegant display, Displays bring it all to life. We have added several new items to our Displays that are guaranteed to make your holiday scene unforgettable.

The construction of our Displays is strong and durable. The fiberglass material is made so the pieces can be used indoors or outdoors. Many of our larger pieces assemble and disassemble with ease making for convenient set up and storage.

Our Displays are painted with an UV automotive grade paint. This is another feature that allows these pieces to stand up to outdoor weather. The paint is vibrant and fade and chip resistant. Attention to detail is important in the design of these figures.

Nativity Scenes

Small Nativity

The true reason for the season is depicted beautifully in these nativity scenes. Whether you want life-size or smaller, we have just the size you need.

These nativity sets are made from polyresin and fiberglass creating the look of ceramic or elegant pottery. The polyresin gives it a weather resistant and chip resistant long life.

Illuminated Displays

Light up your night with our Illuminated Displays. All of our displays are illuminated with LED mini lights. These are some of our most unique and beautiful products. They are the perfect addition to a home or business, full of lights. They bring the glow and warmth we all love around the holidays.

The original designs of the illuminated collection are made out of heavy duty fiberglass, UV coated and can be used both indoors and outdoors. They look great underneath your tree or in a grouping on your lawn.

The interior contains standard LED mini lights. This makes for easy plug-and-go installation and also allows for the lights to be easily replaced as needed, bringing you years of enjoyment.

The translucent fiberglass gives off an almost stained glass quality when the lights shine through. The unique designs and detail make Illuminations one of our most proprietary products.

With everything from giant ornaments to playful characters, Illuminations truly bring light to any holiday display.

Holiday Accents

Who can resist a candy cane to sweeten any holiday display?

The proof of Santa Claus is evident in these Santa Boots. They make a fanciful addition to any decor. One of our most popular illuminated pieces is made from strong, fiberglass.

Our gingerbread grouping makes it fun and exciting for kids and adults alike.

Sweet treats for your holiday decor. From hard candy rounds to wrapped candy, these sweets add a delicious addition to any holiday.

BARCANA TREES

BARCANA, INC. warrants its trees to be free from manufacturer's defects for PVC and structure/hardware for a period of twenty-five (25) years, from the date of original purchase.

THIS WARRANTY DOES NOT COVER DAMAGE RESULTING FROM PULLING SINGLE BRANCHES/TIPS TO MOVE THE TREE. THE TREE MUST BE MOVED BY HOLDING A MAIN BRANCH ALONG WITH THE CENTER POLE (tree trunk).

The liability of BARCANA, INC. Under this warranty and any warranty implied by state law is limited solely to the replacement of products which BARCANA, INC. determines are defective, and does not include liability for incidental or consequential damages. This warranty is expressly in lieu of all other warranties, express or implied, including the warranties of merchantability and fitness for a particular purpose. Any warranty implied under state law is limited to a period of twenty-five (25) years from the date of purchase for PVC trees. Some states do not allow the exclusion of incidental or consequential damages nor a limitation on how long an implied warranty lasts, so the above limitations may not apply to you.

If any BARCANA, INC. product is found defective please notify BARCANA, INC., by mail, e-mail or phone. Please provide the following when contacting BARCANA, INC.: tree style #, copy of original sales receipt, description of the defect and photos of the defect. BARCANA, INC. will repair or replace any BARCANA, INC. product if BARCANA, INC. determines that the defect existed at the time of manufacture or developed under normal use. Freight charges for products considered to be defective are the sole responsibility of the consumer. An RMA (Return Merchandise Authorization) is required for any return prior to shipping to BARCANA, INC. This warranty is enforceable by the original purchaser of the BARCANA, INC. product from an authorized retail store.

LIGHT SETS

All BARCANA, INC. lights are listed with the Underwriters Laboratory. BARCANA, INC. will supply replacement light sets for defective sets free of charge (with proof of purchase) for up to 6 seasons from original date of purchase on LED lights and 3 seasons on incandescent lights.

This warranty excludes:

- Normal bulb burnout. Change burned out bulbs at once. If burned out bulbs are not replaced, the remaining bulbs on the light strand will burn out faster than normal.
- Wear and tear or damage resulting from accident.
- Misuse that can cause multiple-bulb failure.
- Freight charges on light sets are the sole responsibility of the customer.
- Lights damage as a result of outdoor usage.
- Alteration (i.e. dimmers, timers, electronic ornaments)

Fotodiastasi (FDS)

LIGHTS, CARPET & TRANSFORMERS

Warranty lasts 2 seasons for manufacturer's defects.

FRAMES & HARDWARE

Frames and hardware are warranted for 5 seasons for manufacturer's defects.

For up-to-date warranties for Barcana and Light Dimensions products, check barcana.com/warranty.

PERMALITES LIGHT STRIPS & CONTROLLERS

Light strips and controllers are guaranteed for 2 seasons and are covered for manufacturer's defects. The warranty DOES NOT cover acts of nature, such as lightning strikes and damage due to physical abuse or vandalism.

TRACKS & COVERS

Tracks and Covers are guaranteed from manufacturer's defects for 5 years.

For up-to-date warranties for PermaLites products, check permalites.com/warranty.

Nite Time Decor NTD LIMITED TIME WARRANTY

Nite Time Decor guarantees the quality of our products and installation with one of the most comprehensive warranties in the industry. It protects the system and components for years and is effective after the original installation is completed.

TRANSFORMER WARRANTY

Nite Time Decor outdoor transformers carry a lifetime warranty. The warranty DOES NOT cover acts of nature, such as lightning strikes and damage due to physical abuse or vandalism. The warranty is void if anyone other than a Nite Time Decor contractor accesses the transformer for any reason other than timer adjustment. We will make timely replacements and/or repairs as described below at no additional charge.

LIGHT FIXTURE WARRANTY

Nite Time Decor guarantees light fixtures for Lifetime from installation date. The warranty DOES NOT cover acts of nature, such as lightning strikes and damage due to physical abuse or vandalism. In the event of socket failure, Nite Time Decor will provide replacement sockets, with local service location, and if available, provide labor for replacement.

WIRE WARRANTY

Nite Time Decor outdoor low-voltage wire is covered by a 10-year warranty. The warranty DOES NOT cover acts of nature, such as lightning strikes and damage due to physical abuse, vandalism or damage done by others.

LAMP WARRANTY

Nite Time Decor lamps are covered by a 7-year limited warranty from the initial date of system installation. Only when a Nite Time Decor contractor replaces or installs the lamps does the warranty apply. The installation of incorrect lamps by the property owner or another firm that causes system failure and/or fixture damage are not covered by warranty.

LIGHTING CONTROL AUTOMATION WARRANTY

Nite Time Decor timers, controls, and other automation modules carry a 1-year limited warranty.

INSTALLATION WARRANTY

Nite Time Decor guarantees installation for three (3) years from installation date. We offer a Lifetime Warranty on any lighting system that we design, install and maintain. If you choose not to maintain your lighting system with our current maintenance program, your system will be covered only to the limits listed above, or the limits of the individual manufacturer's warranty of the products used in the design. This warranty covers the performance of the Fixtures, Transformer and Installation. All quality fixtures will experience some finish changes over time. This will not affect their performance, rather increases their appeal. All automation components are covered by their specific manufacturer's warranty.

For up-to-date warranties for Nite Time Decor products, check nitetimedecor.com/warranty.
